

TERMS and CONDITIONS

The eCalving™ mobile app for hand-held smart devices is a management tool designed for educational purposes to help farms collect calving-related events and assess compliance with established calving practices. This tool is not intended to replace your veterinarian or other consultants and personnel responsible for maintaining records, cattle health and wellbeing, and the management of your calving program. The data collected using the mobile app may be helpful in providing additional information to aid in your decision-making process. It is important to note that the accuracy of data collected is always dependent on the timing, willingness, and competency of the individual recording the information regardless of the record-keeping method used. Any action taken based on the contents of this website and the use of the mobile app is solely at your own discretion, risk, and liability.
